

## Invitation: Discover the impact of tools for programmatic learning at our upcoming webinar!

Are you driven to advance programmatic learning? We invite you to join KPSRL and Propel in our research initiative, "Tools for Programmatic Learning" on *May 21, 2024, at 14:00 (CET)*.

**Background:** The Programmatic Learning Instrument (PLI) plays a crucial role at the Knowledge Platform Security & Rule of Law (KPSRL), aiming to enhance learning and capacity building in the Security and Rule of Law (SRoL) sector. Our collaboration with Propel aims to explore how tools can effectively enhance learning outcomes. This initiative is a pivotal part of our broader engagement with the Propel Community of Practice (CoP), a dynamic group dedicated to fostering collective impact in international development.

**Objective of the research:** Our research aims to evaluate the role of tools, particularly Propel, in supporting programmatic learning initiatives within the SRoL sector. By analysing Propel's functionality and alignment with partner organizations' needs, we seek to identify areas of success and improvement, ultimately providing actionable recommendations for optimizing programmatic learning within the SRoL sector. With this being said, our joint research endeavour seeks to deepen the understanding of using tools - such as [Propel](#) - within the realm of the Security and Rule of Law (SRoL) sector and their role for programmatic learning.

### Webinar overview

With this webinar session, we will provide an overview of our research collaboration, uncovering the role of tools for programmatic learning.

We will cover two main objectives during the session:

- 1) Unpack challenges and opportunities for programmatic learning identified through engagement with different actors as part of the research;
- 2) Launch of the Community of Practice.

We aim to explore the findings together and provide practical insights about how to *do* programmatic learning more effectively.

### Why participate?

By participating in this project, you will have the chance to:

- 1) **Exchange Insights:** Collaborate with peers on the topic of programmatic learning and innovative approach to learning.
- 2) **Deepen Understanding:** Gain a profound understanding of both organisational and programmatic learning.
- 3) **Explore Tools:** Discover how complementary tools like Propel and approaches used in the Programmatic Learning Instrument can support learning processes.

## How to join?

We invite you to join us in this phase of the research project to validate and reflect on the initial findings. Join us on May 21, 2024, at 14:00 (CET) for a 90-minute collaborative session for the second webinar of this trajectory to hear more challenges and opportunities to enhance the role of tools in programmatic learning.

## Introducing the Propel Community of Practice (CoP)

With this webinar, we are also launching the Propel Community of Practice. The Propel CoP is a central element of our initiative, offering a collaborative platform that empowers professionals through shared learning and actionable insights. As part of the CoP, members can engage in:

- Engaging Learning: Participate in focused webinars and workshops.
- Impact Research: Contribute to surveys assessing the influence of collective learning.
- Networking and Resources: Connect with a global network, access curated content, and receive expert guidance.
- Strategic Influence: Participate in setting priorities and shaping the sector's understanding through active involvement in discussions and working groups.

## Join the Movement

If you are a professional eager to leverage collective intelligence for social good, or a team looking to translate lessons into strategic actions, we welcome you to join the Propel CoP. Sign up today and start shaping the future of learning and development within the international humanitarian sector.
